

All Lake County Archived Tax Maps now available as images on one CD-ROM

The Lake County GIS Department now has images of the Lake County Archived Tax Maps. These are tax maps that have been retired from daily use, due to a lack of space for ownership information. The map images are ground within City, Village or Township folders, as are the old indexes. To view a map, open the appropriate folder, double-click on the image and it will display in Microsoft Imaging – a program on all Windows PC's.

Information is clearly legible and includes all the historical ownership information that you are used to obtaining in the Tax Map Office – over 2,400 maps all at your disposal on one CD. More information is available at 440 350-5943. Or drop by and purchase the entire Lake County Tax Map archive for \$50. Checks should be made out to the Lake County GIS Department.
